

JAVAFX Programming

1. Design the following interface using JAVAFX. Print the message successfully registered once you click on register button.

The image shows a JavaFX window titled "Registration Form". It contains the following elements:

- Name:** A text input field.
- Email:** A text input field.
- Phone:** A text input field.
- Password:** A text input field.
- Confirm:** A text input field.
- Country:** A dropdown menu with "Select..." as the placeholder.
- Gender:** Two radio buttons labeled "Male" and "Female".
- Language:** Three checkboxes labeled "Arabic", "English", and "Spanish".
- About You:** A text area with the placeholder text "Your Biography...".
- Register:** A button at the bottom of the form.

2. Design a simple tic tac toe interface using JAVAFX.

3. Design an interface with multiple images positioned in a grid using Javafx.
